

## ANTS

Of all the insects, ants live a life closest to that of man. They live in a man's home or near his home. They can be found in his kitchen, in his dining room or anywhere in his yard.

Ants are insect pests. They walk all over dead animals and wastes carry germs on their legs.

The best way to control ants is to keep places, especially homes, clean. Another way is to destroy their nests by pouring boiling water, kerosene, or oil in them.

1. Write what this selection is about and encircle your answer.
